# Flutter samples

 Master Branch CI passing

A collection of open source samples that illustrate best practices for [Flutter](#).

## Visual samples index

The easiest way to browse through the samples in this repo (as well as a few others!) is the [visual samples index](#).

## Tip: minimize download size

As this repository is quite big, you can use svn to download a single example. For example:

```
svn co https://github.com/flutter/samples/trunk/provider_shopper
```

You can also use a shallow clone to download just the latest revision:

```
git clone --depth 1 https://github.com/flutter/samples.git
```

# Interested in contributing?

---

See the [contributor's guide](#)!

## Questions or issues?

---

If you have a general question about one of these samples or how to adapt its techniques for one of your own apps, try one of these resources:

- [The FlutterDev Google Group](#)
- [The Flutter Gitter channel](#)
- [StackOverflow](#)

If you run into a bug in one of the samples, please file an issue in the [main Flutter repo](#).
